Introduction to Artificial Intelligence with R Course – FAETEC | 2024

RELEVANT PROJECTS

Mat-in | PHP Web Developer – 2022/2023/2024/ Repository
Marketplace for agricultural and family farming products. I developed it with my TCC group during the technical course. The site offers an easy-to-use interface to search, compare, buy and sell products from a wide selection of agribusinesses that vary in categories, size and price. The site also has product filtering and a dashboard for users.
- 100% responsible for layout and design
- Integrated with Firebase (Auth, Firestore, Functions, Remote Config) • Developed the UI with Figma and Bootstrap
- Developed automatic generation of PDF reports on users, products and locations with a framework called mPDF.
